TO WHOM IT MAY CONCERN

CARRIAGE OF LIFEJACKETS ON AIRCRAFT

The lifejacket CO2 gas cylinders carried here are guaranteed tested to the following specifications:

1. Will not blast until a pressure greater than 540 Bar
 2. Each cylinder is pressure tested to 250 Bar
 3. Each cylinder is filled at a temperature of 30° centigrade to a pressure of 100 Bar
- These items can be carried on aircraft, with the approval of the operator, under current IATA Dangerous Goods Regulations.

On behalf of Seago Yachting Ltd.

A handwritten signature in black ink, appearing to read "Dan Temple". The signature is fluid and cursive, with a long horizontal stroke at the end.
